Item V

None of the documents cited on the international search report disclose a bleaching composition according to claim 1, in particular there is no disclosure of a ligand where at least one of R1 or R2 is a non-aromatic 8 - 22C alkyl chain.
Novelty of claims 1 - 23 is thus acknowledged.

The objective technical problem is seen as to provide alternative bleaching catalysts. There is no indication in any of the cited art, which may be used for assessing inventivity, that the known bleaching catalysts may be modified to arrive at the subject matter of present claim 1.
Inventivity is also acknowledged.
